Miguel Rengifo

Product Lead

São Paulo, Brazil | Open to remote roles | miguelreng@gmail.com | linkedin.com/in/miguelreng

Product lead and former founder with a background in software development. I lead product work in robotics and physical AI and have built early-stage products in B2B SaaS and consumer marketplaces.

Experience

Robot.com

Product Lead | May 2026–present · Promoted

Led product for R-noid, Robot.com's humanoid robot, and REMI, the operating system that connects its fleets, operator tools, and data. My scope includes product strategy, go-to-market, and data collection for physical AI.

AI Product Engineer and Designer | Jan–May 2026

Led the creation of product spec documents for Robot.com's robot lineup and worked closely with CEO Felipe Chavez to validate new product concepts.

96 / Index96

Founder and Chief Design Officer | 2022–2025

Worked closely with founders of early-stage startups, including companies backed by Y Combinator, to define and build first versions of their products. At Synthflow, helped shape the first release of its voice AI platform, including the web app and voice-agent widgets. Other projects included a Bitcoin wallet and B2B software.

Univision

Senior Product Designer | Oct 2021–Jun 2022

Contributed to Uforia's mobile and web experience and to early product research for ViX.

Mercado Libre

Senior UX Designer | Mar–Sep 2021

Worked on tools that support seller operations in Brazil.

Independent Consulting

Design Consultant | Jan 2020–Mar 2021

Consulted on products for Instana, Intuitivo, and other startups.

Earlier ventures

Co-founder and CEO of Poetri (2017–2019), a serverless platform for developers. Co-founded LastFood (launched 2020), a marketplace that helped restaurants sell surplus food, and Quiickly / SinRopa (2015–2017), selected for Start-Up Chile.
Junior Software Developer at Parquesoft (2012–2013).
